Keep It Current!

Keeping your address current is more important than you realize, and the success of your website just might depend on it. For example: "Marty" was a happy and hard-working customer who failed to notify Aplus.Net when his email address changed. Marty didn't realize that he was missing important emails notifying him that his domain name was about to expire. Because of this simple mistake, Marty lost not only his domain name to a competitor, he also lost countless hours of hard work and months of progress. Don't make Marty's mistake—Keep your information current!
